

Ideological Education and Creative Talent Industrial Ecological From Perspective of Moral Education

WANG Xinxin

Xi'an Fanyi University, Xi'an, China

Creative talent industrial ecological need develop and flourish and need sustainable push under circumstances of economic modernization, and creative talent industrial ecological need support of infrastructure develop, need natural ecological perfect, and need human environment's sustainably perfect. Infrastructure develop is ideological education and creative talent industrial ecological develop's basis, and natural environment is ideological education and creative talent industrial ecological develop's natural guarantee, and social environment is ideological education and creative talent industrial ecological develop's important guarantee, and industrial ecological ability is ideological education and creative talent industrial ecological develop's new competence, and industrial ecological vitality is ideological education and creative talent industrial ecological develop's new drive.

Keywords: ideological education, creative talent industrial ecological, moral education

Creative talent industrial ecological need develop and flourish and need sustainable push under circumstances of economic modernization, these flourish and push need nudge of economic system, need human resource and material resource's support, and more need ideological education's notion guide and outlook of value direct, whereas, notion guide and outlook of value direct need influence and direct of moral education, moral and moral education can not only direct support discipline's develop but also direct creative talent industrial ecological and ecologies' develop orientation. Creative talent industrial ecological develop not only need economic develop's support but also need moral's requirement on the aspect of notion, and values, and ideal and faith. Creative talent industrial ecological need support of infrastructure develop, need natural ecological perfect, and need human environment's sustainably perfect.

Infrastructure Develop: Ideological Education and Creative Talent Industrial Ecological Develop's Basis

Disciplines' develop and ecological develop need infrastructure's support; this sort of support not only includes material aspect, but also includes spiritual aspects, and these supports can push discipline's develop, like or as ideological education, and at the same time push ecological develop, like creative talent industrial ecological develop. Infrastructure as material can push ideological education persistently develop and these develops reflect infrastructure's support effect and rely effect of infrastructure and reflect infrastructure's basic

effect and pre-posed effect to this discipline develop and creative talent industrial ecological develop. Materials include traffic instrument, pipe instrument, house instrument, car instrument, cloth instrument, food, and water and so on, and these materials can push and guarantee ideological education's develop and ensure ideological education can develop towards an orientation of more smooth, more harmony, and more convenient and more safe, and ensure creative talent industrial ecological persistently develop and persistently leap towards. Under influence of moral education, infrastructure develop and construct have become more reasonable, more moral, more adaptive to tradition, and more align with people's requirement. Infrastructure's develop brings creative talent industrial ecological with more material basis, more welfare guarantee, more material products, and flourish with material can provide tough basis for development of this sort of industrial ecological. Infrastructure as spiritual can provide spiritual drive and spiritual direct for develop of ideological education and creative talent industrial ecological, these infrastructures can bridge notion and thinking belt among people and talents and provide theoretical direct and leap and increase in notion for ideological education and creative talent industrial ecological. Infrastructure as quality and quantity can provide quality guarantee and quality assurance or quality ensure for ideological education and creative talent industrial develop and provide quantity ensure and quantity priority for them, and this sort of ensure can enhance self-confidence power and quantity ensure and quantity over-match of ideological education and creative talent industrial ecological. Infrastructure as new stuff can provide collaborative and industrial upgrading opportunity for ideological education and creative talent industrial ecological. These infrastructures can provide upgrading guarantee and co-operation guarantee for this discipline and this industrial ecological. Therefore, infrastructure develop is ideological education and creative talent industrial ecological develop's basis and develop root.

Natural Environment: Ideological Education and Creative Talent Industrial Ecological Develop's Natural Guarantee

Nature environment is basis of human survival and human flourish, and this sort of environment creates human and human itself in process of developing of chronically long history. Human's health, survive, vital, and creative and innovative all stem from nature environment. Human's develop and probe all stem from nature environment also. Moral education also originates inspiration and thinking material from natural environment, and obtains theoretical spring and theoretical material from nature environment. Therefore, people think that moral and moral theory stem from nature and can be influenced by nature in process of developing and flourishing, this influence is outcome of objectivization of essential power of nature, and this procedure must be innovate and enhance in process of inter-influencing between nature and human.

Moral and moral education must be influenced by nature and ideological education also must be influenced by nature and nature environment. Ideological education emphasizes internalize and externalize of theory and this process is a sort of imitating from nature and nature environment. Ideological education emphasizes empower every stuff and everything with energy and vitality and affects people relying on moral; this emphasis reflects ideological education affected by nature and learned from nature. Creative talent industrial ecological is also affected by nature and nature environment and also influenced by nature and nature environment. Industrial ecological can also be effected by nature power and these nature powers include wind, rain, sunshine, water, and so on, and these factors can affect industrial ecological nature fostering and nature maturing, and these fostering

and maturing not only show itself in aspects of social growth, but also show itself in aspects of nature growth. Nature growth means industrial ecological nature grow and nature mature; it reflects the ecological nature growth rate and nature mature rate. This means industrial ecological can grow in nature status and can be matured in status of nature. Industrial ecological nature growth means ecological can have good nature environment, these contents include smooth wind, harmonious rain, friendly sunshine and so on, and these factors included and obtained must be relied on harmonious relation between human and nature and harmonious relation among humans.

Paramount leader of China, Xi Jinping emphasizes that people must put the emphasis on new industry's market environment perfect and relevant policy scheme perfect, and take the measure of measuring industrial innovate project, optimize technological innovate organizing mode and value scheme, and push innovate equipment construct, push process of technical research developing, and product generate and upgrade. Perfect knowledge property rights protect institute, sound knowledge property rights public service scheme, and technical transaction service platform networks, and take standardized leading project of new industry, and put the emphasis on law enact in new areas (CPC Central Committee, 2026). From utterance of Xi Jinping, people can conclude that Xi emphasizes market environment construct and policy scheme construct, and emphasizes innovate project and industrial upgrading, and emphasizes institutionalized protect, networklized protect and law enactment protect, and these measures can promote industrious ecological persistently perfect and innovate, and can promote industrious ecological persistently upgrading.

Social Environment: Ideological Education and Creative Talent Industrial Ecological Develop's Important Guarantee

Moral education means a sort of social environment because moral education reflects a sort of teach form, teach manner, teach content, and teach mode, and these teach content and teach mode can reflect a sort of social atmosphere and social surroundings, and these social atmosphere and surroundings can be concluded as and summarized as social environment. Therefore, social environment refers to a sort of moral education and this is reason why people deemed social discuss as an important content of moral.

As a sort of moral education, social environment can teach people what matters can conduct and what matters cannot conduct, and teach people what matters are people's like and what matters are people's don't like, and guide people and direct people step towards and lean towards a road or trail that is most close to social requirement and social environment. Thus, social environment can reflect moral education's content and moral education's requirement, and social environment can reflect as a sort of moral education.

Under the influence of social environment, ideological education begins to focus on relations among people and relations among societies and these relation focus makes ideological education more concentrate on produce labor's develop and advance (Wang, 2011), and produce relation's develop and probe, and more concentrate on economic structure's develop and social relation's develop and probe, and these focus and concentrate make ideological education more emphasize relation and connect maintenance and transformation between learn and learned, internalized and externalized, economic basis and uppers, and social existence and social awareness. These focus on maintenance and transformation makes ideological education step further and lean further.

Under the influence of social environment, creative talent industrial ecological can also develop and step further. Social environment's persistently innovate can provide a prior and perfect surroundings for creative talent industrial ecological, and can promote this sort of ecological persistently innovate and perfect. Polity, institute, mechanism, system, scheme, and other relevant stuff can be deemed as constitute factors of social environment, and these factors provide guarantee from aspect of society, for industrial ecological and these factors can promote industrial ecological develop and step forward. New technology also constitutes important part of social environment and this new technology not only stands a sort of new produce labor, but also stands an important social environment factor, and this factor not only pushes industrial ecological develop but also pushes industrial ecological step forward a new phase and encounters a new beginning and a new develop opportunity.

Industrial Ecological Ability: Ideological Education and Creative Talent Industrial Ecological Develop's New Competence

Industrial ecological ability refers to a sort of ability and competence that emphasize ecological must have a sort of ability and this sort of ability must can push industrial ecological develop and industrial ecological leap forward, and this sort of ability can be increase and upgrade via following trails:

Firstly, expand quantity of firm and promote firm becoming subject of industrial ecological develop. Industrial ecological want to obtain ability which means this sort of ecology must bring itself with relation and connect, only relation and connect can bring ecological with ability, and can bring ecological with certain competence, and shape relation and connect become an important trail for ability fostering; the more the ecological have in aspect of relation and connect, the better the ecological ability shape. Key-point of ability fostering is relation fostering and connect fostering and relation fostering and connect fostering can be traced back to produce labor develop, produce relation shape, economic relation shape and social relation shape. These relations' shape can promote shaping industrial ecological ability develop, and shaping industrial ecological ability reform, and can bring itself with ability transformation and ability upgrade, with ability renew and ability innovate. People want to push industrial ecological ability develop and its key point is that people must utilize subject status of firm, and promote firm exert important influence in process of relation fostering and connect fostering, and exert important influence in process of ability fostering and ability maturing. Secondly, people must realign creative resource and utilize creative resource to shape industrial ecological ability. Ability construct needs resources as basis and rely, and this sort of basis and rely can promote industrial ecological ability step further and promote industrial ecological ability persistently upgrading and become more sound and more perfect. Creative resource refers to a series of resource that is both relevant to creative people, and relevant to stuff with creative feature, such as computer, robotic, and so on, and these resources can promote and robust industrial ecological ability step further and probe further and promote this sort of ability persistently perfect. Thirdly, build new research institution and use these institutions to robust industrial ecological ability. New research institution is important increase point of this sort of ability; under the influence of these research institutions, industrial ecological ability can achieve persistently innovate and can achieve persistently perfect (CPC Central Committee, 2026).

Industrial Ecological Vitality: Ideological Education and Creative Talent Industrial Ecological Develop's New Drive

Industrial ecological vitality is important drive of industrial ecological develop, and can push creative talent industrial ecological persistently develop and persistently probe, and can push industrial ecological persistently robust (Li, 2026).

Industrial ecological vitality can consolidate ideological education with new thinking and new notion and these new thinking and new notion can promote ideological education step forward a new orientation of more free, more democratic, more equal, and more harmonious, and step forwards a new orientation of more open, more embrace, and more nature, and more intelligence. This step forwards can reflect industrial ecological vitality's contribute to ideological education, and this contribute will push this discipline persistently step forward (Xi, 2019).

Industrial ecological vitality's nudge, and ideological education's step forward can result in creative talent industrial ecology's persistently develop, and can result in this sort of industrial ecological persistently innovate, and these develop and innovate can provide ideological education with new theory, new thinking, and new mode, and can provide creative talent industrial ecological with new push and new drive.
